Pull request overview

Migrates the portfolio site from Astro to a Next.js (App Router) architecture, re-establishing SEO endpoints (robots/sitemap/security.txt), routing, and global styling while keeping the existing React-based UI.

Changes:

- Replace Astro pages/layout with Next.js `src/app` routes, layout/metadata, global CSS, and `not-found` handling.
- Add/port SEO + utility endpoints (robots, sitemap, `.well-known/security.txt`) and migrate the contact API to a Next.js route handler.
- Move projects/certifications content to JSON files in `public/` and update UI (project type filtering + badges, ambient audio behavior, responsive tweaks).

Pull request overview

Migrates the portfolio site from Astro to Next.js (App Router), replacing Astro pages/layout/routes with Next equivalents while keeping existing React-driven sections and adding some UX improvements (project filtering, certifications section integration, ambient audio).

Changes:

- Replace Astro config/pages/layout with Next.js App Router structure (`src/app/*`), including sitemap/robots and route handlers.
- Move project/certification datasets into JSON under `public/data/` and update consumers.
- Add ambient background audio orchestration and update UI/scroll sections (filter tabs, certifications section, responsive tweaks).

Reviewed changes

Copilot reviewed 39 out of 45 changed files in this pull request and generated 5 comments.

+                                textTransform: 'capitalize',
+                            }}
+                        >
+                            {f === 'all' ? 'All' : typeMap[f].label}
+                        </button>
```

Copilot bot 1 minute ago Medium

The filter UI uses a set of buttons to represent a selected state, but the selected state is only conveyed visually via className. Add an accessibility hint such as `aria-pressed={filter === f}` (or implement the ARIA tab pattern with `role="tablist"` / `role="tab"`) so screen readers can announce which filter is active.

`src/components/sections/Projects/ProjectDetail.tsx`

Comment on lines +30 to +33

```
+ const typeMap = {
+     professional: { label: 'Professional', color: 'var(--color-secondary)', bg: 'rgba(255,13
+     personal: { label: 'Open Source', color: 'var(--color-primary)', bg: 'rgba(127,176,105,0
+ };
```

Copilot bot 1 minute ago Medium

`typeMap` is duplicated from `ProjectsSection.tsx` . Consider importing a shared `project type` definition from a single module so changes to labels/colors/icons don't require updating multiple files.

src/components/audio/AmbientAudio.tsx

Comment on lines +12 to +16

```
12 +
13 + export const AmbientAudio: React.FC = () => {
14 +     const { muted } = useSoundContext();
15 +     const audioRef = useRef<HTMLAudioElement | null>(null);
16 +     const fadeRef = useRef<ReturnType<typeof setInterval> | null>(null);
```

Copilot bot 1 minute ago High

`AmbientAudio` is typed as `React.FC` but this file doesn't import `React` (or `FC`) anywhere, which will fail type-checking (e.g., "Cannot find namespace 'React'") under the default Next/TS setup. Import the appropriate React types (e.g., `import type { FC } from 'react'`) or avoid the `React.FC` annotation.

BernardoMoschen wants to merge 21 commits into `main` from `feat/nextjs-migration`

Copilot bot 1 minute ago Medium

`params` is typed as a `Promise` and then `await`ed, but in the Next.js App Router `params` is passed as a plain object. This incorrect typing can hide real issues and is inconsistent with Next's route handler signatures. Update the function signatures to `{ params: { slug: string } }` and remove the unnecessary `await`.
